

CHERRYBARK OAK (*Quercus pagoda*)

Cherrybark Oaks are suitable for medium to large areas, and are one of the fastest growing trees in the Red oak family. The leaves are green in summer, and turn brown to red in the fall. The Cherrybark Oak exhibits a rapid growth rate, and prefers well-drained soil and full sun. The tree grows to a height of 80' on average, with a canopy width of usually no more than 50'.
