

**SMOKE TREE**  
*(Cotinus coggygria)*

Smoke Trees are suitable for small areas. Their leaves are a smoky pink color in summer and turn medium blue-green to a yellow-red-purple in the fall. The Smoke Tree exhibits a moderate growth rate, is adaptable to many soil conditions, and prefers partial shade to full sun. The tree grows to a height of 10'-15' on average, with a canopy width of usually no more than 12'.
